Experience

GalaxEye

Signal Processing Intern

May 2025 - Present

Bengaluru, Karnataka

- Developed a GPU-accelerated SAR image stitching pipeline, automating the stitching of hundreds of images — reducing a manual process that took several days to just seconds through code.
- Implemented phase curvature autofocus to correct Synthetic Aperture Radar(SAR) phase errors via low-order polynomials.

National Institute of Science Education & Research (NISER)

Summer Research Intern

May 2023 - Jul 2023

Bhubaneswar, Odisha

- Georeferenced Chandrayaan-2 IIRS images using SPICE, & FOV methods to compute sub-spacecraft & sub-solar positions.
- Calculated incidence, emission, and phase angles for lunar topography analysis and angle distribution plots.
- Evaluated accuracy (avg offsets 750 m near equator, 2200 m near poles) and recommended Computer Vision Techniques.

Projects

Comparative Analysis of Seismic Data Denoising Techniques | Python, Tensorflow, Pytorch

Aug 2024 - May 2025

Master's Thesis

- Implemented a U-Net in PyTorch to denoise 3D seismic volumes, achieving SSIM 0.92 on test data.
- Outperformed F-K, tau-p, median, and Wiener filters—improving SSIM by 0.15.
